

Essence

Mobile Desktop Phone

Comfortable office phone |

Easy call transfers and conferences |

Contacts sync & Cloud services |

Standard SIM card |

Just pick up the receiver

Essence is a business phone as you already know it. It uses mobile network, but it looks and behaves like office landline phone. You do not need to learn how to use it.

Discuss, delegate, decide

Conferences and call transfers, daily bread of business people. Keep everybody in the loop with advanced functions in an intuitive phone.

Power users are users too

Essence offers a lot also for power users. It comes with unique cloud services. You can access call list, messages and contacts through the web. You can also synchronize contacts with other devices or manage phone groups.

Phone as simple as it can be

Intuitive use

Comfortable navigation and friendly interface

Business casual

Design and behaviour of standard office phone, features of mobile phone

Light signals

Indicates incoming call, active loudspeaker, silent mode and missed calls

Silent mode

When you do not want to be disturbed

Quick dialling keys

For eleven most frequently called numbers

Loudspeaker

One-touch hands-free calling

Amazing possibilities when you need it

You can use our unique JabloTool Cloud services to access your Essence phone from any computer through the web. Simplicity, reliability and strong data protection are our key priorities. You can count on it.

Access your call list, read and write text messages, manage your contacts remotely and synchronize your Essence with other devices.

Are you responsible for group of phones? Use our tool for centralize administration to keep phones within your company updated. Some of the mentioned features will be available in 2014.
